Assisting faculty staff researches at ITB Department of Astronomy with a focus in deep learning. 3 years working on practical machine-learning library development. Completed IBM AI Engineer Professional Certificate.

Previously had a certain amount of internships at startups, 4 years participation in Data Science and Information Security competitions, captaining a collegiate Information Security team, leading a team for national scale college events, and performing social public outreach.

Experience

01/2020 - Present
Ignitus
Pittsburgh,
Pennsylvania

Machine Learning Intern
Development of a MOOC on the basic concepts of Machine Learning, deploy machine learning models in production as API with Flask and creation of 10 separate modules/courses/tutorials about the 10 main Python libraries for ML.

01/2020 - Present
Astronomy Department,
Bandung Institute of
Technology
Bandung, West Java

Research Assistant
Assisting research on astronomical big data, galaxy classification, and neural network for GAIA database and spectral classification. developing the web service for Indonesia Astronomy Olympiad National Team.

08/2019 - 12/2019
Introduction to
Computation
Laboratory, Bandung
Institute of Technology
Bandung, West Java

Infrastructure Team
Responsible as DevOps software engineer for infrastructure in course and lab, in terms of the website, moodle, pipeline, and any system related. Providing good UI and UX on students practical session, security systems, and system availability. Fixing previous bugs on SQL database schemas, PHP scripts, building a new platform with React.

06/2019 - 08/2019
Chatbiz.id
Bandung, West Java

Data Scientist Intern
Created business insight as a web service from user transaction data to be converted into business activity analytics.
